5 LITRE

ALUMINIUM CLEANER INFORMATION SHEET

USE:

An effective remover of dirt and grease from aluminium surfaces.

DIRECTIONS:

Wear protective gloves.

Dilute 1 part with 5 parts of water for cleaning anodised aluminium, wipe solution onto the surface and brush vigorously. Wipe dry and then rinse with a weak alkali solution to neutralise and stop any reaction. Finally rinse thoroughly with water. Always test an inconspicuous area for suitability.

TECHNICAL:

| | |
|----------------------|--------------------------------|
| State: | Liquid |
| Colour: | Red |
| Odour: | Characteristic odour |
| Oxidising: | Non-oxidising (by EC criteria) |
| Solubility in water: | Soluble |
| Viscosity: | Non-viscous |
| Flash point°C: | >70 |
| pH Level: | 1 |

PERSISTENCE AND DEGRADABILITY: Biodegradable.
